

A greener paper solution.

When you need it.

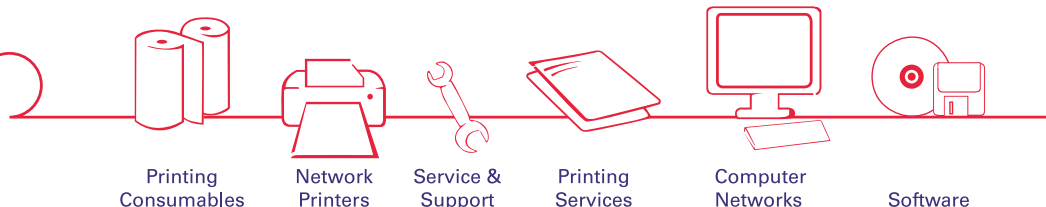

Extreme climate conditions are making it increasingly evident the impact our actions are having on the planet. This is driving a high level of demand for environmentally friendly business.

Aish, in conjunction with Océ, have made a significant step in the green direction. Within the bond paper market thousands of rolls of paper are printed every year. Yet, to date, no recycled paper has been available that offers the consistent, polished results needed to present a professional impression in the wide format printing space.

Aish now stock Océ's 80gsm LFM145 Recycled PPC paper for use in most wide format toner based printers. This Océ solution consists of 80% recycled fibres, whilst showing an excellent white-point and smooth finish. It is the perfect white paper for everyday use, where the quality of your documents must reflect the environmental approach of your work and organisation.

Talk our staff today for environmentally friendly paper, when you need it.
